

DIBIN SABU		
 Kochi , Kerala  9567538573  dibinsabu111@gmail.com  Linked In		
Summary	Motivated and detail-oriented Computer Science student passionate about DevOps, cloud computing, and Linux systems . Hands-on experience with AWS & GCP , CI/CD pipelines, Docker/Kubernetes, scripting (Python/Bash), and automation tools. Strong understanding of networking fundamentals (TCP/IP, DNS, HTTP) , with proven ability to deploy scalable, resilient infrastructure and optimize workflows.	
Experience	Camerin Folks - Automated data workflows using Python & SQL, reducing manual processing by 30%. - Built scripts and dashboards for monitoring data pipelines and system performance. - Gained experience in cloud deployment of ML workflows on AWS.	
Education	Viswajyothi College of Engineering and Technology	2021 - 2025
	Vazhakulam	Computer Science And Design
	St. Augustine's Higher Secondary School, Kalloorkad	2019 - 2021 Higher Secondary School
	Nirmala Public School	2007-2019
	Muvattupuzha	Secondary Education
Projects	Multi-Service Microservices Deployment on Cloud On Going - Deployed multiple microservices (Node.js and Python) on AWS EC2 and GCP Compute Engine using Docker and Kubernetes. - Implemented service discovery, auto-scaling, and networking configurations to ensure high availability and fault tolerance. - Reduced deployment time by 50% and maintained 99.9% uptime for all services. CI/CD Pipeline for Full-Stack Application - Developed a CI/CD pipeline using Jenkins and GitHub Actions to automate building, testing, containerization, and deployment of a full-stack MERN application. - Integrated Docker and Kubernetes to streamline deployment workflows across multiple environments. - Reduced manual deployment errors by 80% and improved overall release efficiency Cloud Infrastructure Automation with Monitoring - Automated cloud infrastructure provisioning using Terraform and Ansible, including EC2 instances, S3 storage, IAM roles, and networking components. - Configured monitoring and logging dashboards using CloudWatch, Prometheus, and Grafana to track performance and system health. - Enhanced system reliability and reduced manual intervention by 60%, ensuring scalable and secure deployments.	
Volunteering	NSS Volunteer Joined hands with Kerala Police for Labor Migration Team Kerala

Declaration		
Skills	Cloud Platforms: AWS (EC2, S3, Route53, IAM), GCP (Compute Engine, Cloud Functions) Containers & Orchestration: Docker, Docker Compose, Kubernetes (GKE/EKS) CI/CD & Automation: Jenkins, GitHub Actions, Bash/Python scripts, Infrastructure as Code (Terraform/Ansible) Monitoring & Logging: CloudWatch, Prometheus/Grafana basics Version Control: Git Linux & Networking: Ubuntu/C	
Interests	- Cloud computing and multi-cloud architectures (AWS, GCP) - Containerization and orchestration (Docker, Kubernetes) - CI/CD automation and DevOps best practices - Linux systems and network infrastructure - Monitoring, observability, and performance optimization	
Declaration	I Dibin Sabu confirm that the information provided is accurate and true to the best of my knowledge.	
Certifications	Industrial Visit- Red Team Hacker Academy Data Science & Machine Learning Workshop on IoT(Asthra 7.0) at St. Josephs College, Pala 1-Day PCB Workshop at VJCET GDC Workshop	
Languages	English Malayalam Tamil
